SAP HANA

Training Highlights:

- Real Time Instructor
- SAP Certified Trainer
- SAP Training with Live Examples
- SAP Practical after every major topic and FAQ s from interview point of view

HANA Introduction

- Introduction to SAP HANA
- HANA – In Memory Computing
- Technology overview
- HANA – In Memory Strategy
- HANA Architecture
- HANA System requirements
- HANA Modules
- HANA with BW
- HANA with ECC
- HANA administration & Security

Architecture

- HANA Engine Overview
- Different HANA Engine Types
- Row Store
- Column Store
- Persistency Layer
- Business Impact of new architecture

Modeling

- HANA Modeling studio
- Modeling Process flow
- Levels of Modeling in SAP HANA
- Schema and Overview
- Creating Tables in Data
- Loading some sample Data from Local File

- Normal View concept

Advance Modeling

- Concept of Package
- Attributes
- Measures
- Attributes Views
- Attribute Time Based View
- Attribute Hierarchy
- Analytical Views
- Calculation Views
- Export & Import
- Currency Conversion
- Units Conversion

CE-Function

- Calculation Views Using CE Function
- Different Type of CE Function
- CE-Function on Views
- CE-Function for JOIN, UNION

SQL Queries Basis

- DDL
- DML
- Writing Simple Queries
- Select, Insert, Update, Delete, Distinct.
- Join, Inner Join, Left Outer Join, Right Outer Join, Full Join, Cross Join.

SQL Queries

- Synonyms
- Triggers
- Procedures
- Sequence Creation
- Functions
- Decision Table

Loading and replication process

- SAP HANA database
- HANA client components
- HANA Data loading process

- Loading and replication process: cont..
- Data loading mechanism
- Data replication process
- Replication Server
- Replication Architecture
- BO Data Services data extraction
- Introduction to Data Services

DATA PROVISIONING: SAP LANDSCAPE TRANSFORMATION (SLT)

- Data provisioning overview
- Load, Replicate, Stop Replicate, Suspend, Resume
- SAP landscape transformation set-up
- Concept of SLT replication
- Architecture and key building block
- Technical requirement and system set-up information for LT replication server

ODATA Services.

Pre-requisites

LAB Setup for HANA:

- 1. We Need to Purchase the HANA Online server.**
- 2. With 8GB RAM.**
